Art Unit: 3723

1. Claims 1-9 contains the trademark/trade name TORX. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. The trademark must be deleted and replaced with a structural description thereof.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over West in view of Seidl.

West discloses all of the claimed subject matter except for having a star-shaped, six-pointed, recess/engagement section. Seidl discloses that the recess/engagement section may be star-shaped and six-pointed. It would have been obvious to one having ordinary skill in the art to form the recess/engagement section of West as star-shaped and six-pointed to provide high efficiency as taught by Seidl.

Note that West discloses substantially parallel walls or straight-walled cross-section as broadly claimed by applicant. It is further noted that the claims do not define

Art Unit: 3723

the orientation of the parallel walls or straight-walled cross-section. Additionally, Seidel discloses that the walls may be parallel or have a straight-walled cross-section.

Consequently, it would have been additionally obvious to form the recess/engagement section of West with parallel walls or with a straight-walled cross-section to provide high efficiency as taught by Seidl.

4. Claims 1-3 are may be given favorable consideration if rewritten to overcome the errors as set forth in paragraph 1, above.

5. Any inquiry concerning this communication should be directed to D. S. Meislin at telephone number 703-308-3671. Official responses may be faxed to 703 872-9302 and after final responses may be faxed to 703 872-9303.
